PIPESAK.COM

WE PROTECT WHAT YOU BUILD.™

WHY CHOOSE PIPESAK

At PipeSak, our vision is simple: We believe that every product that touches a pipeline should be engineered to ensure long term integrity. PipeSak has been supplying the oil & gas industry with engineered products for pipeline stability, support, and protection for more than 20 years. We work hard to ensure our products meet your rugged construction standards, stay within your budget, and offer reliable support. PipeSak knows pipelines and understands what it means to build something that lasts.

OUR SERVICES

FILLING SERVICES

We support customers from start to finish, offering a wide range of field services, including filling and training to ensure that every project is successful.

ENGINEERING SERVICES

PipeSak engineers are experts in oil and natural gas pipeline integrity. Let us support you in identifying cost savings and answer your questions about pipeline stability, safety, and protection.

ENGINEERED BUOYANCY CONTROL.

PipeSak® geotextile pipeline weights are filled using natural, local aggregate and placed on the pipeline to provide long term buoyancy control.

- STRONG
- ECO-FRIENDLY
- SAFE & DURABLE
- EASY INSTALL

ENGINEERED PIPELINE SUPPORT.

PipePillo® is a structured pipeline pillow (SPP) used to safely support fully loaded pipelines, both in and out of the trench.

- COST EFFECTIVE
- STRONG
- EASY INSTALL
- SMART CHOICE

ENGINEERED PIPELINE PROTECTION.

PipeJacket™ flexible pipe wrap protects pipes from minor impact and abrasions in rocky conditions. The flexible strands provide superior protection for your pipeline coating during backfilling.

- SMART CHOICE
- STRONG
- MORE EFFICIENT
